<b>Summary:</b>	
<p>The attached presentation details the development of the Norfolk and Waveney System clinical strategy.</p> <p>Developing a clinical strategy is a key priority in ensuring that, as system partners, we are aligned in our purpose and mid to long term efforts as we transition from pandemic crisis response, through recovery and into the ‘new sustainable’ future. While the challenges of the next 18 months are formidable, it is important that as a system we are able to have a longer term clinical plan to help achieve our vision.</p> <p>We have agreed a three stage approach to defining, engaging, agreeing and publishing our system clinical strategy:</p> <ol style="list-style-type: none"> <li>1. Understanding the new strategic context</li> <li>2. Agreeing strategic clinical objectives</li> <li>3. Agreeing the supporting clinical strategy that will deliver the clinical objectives</li> </ol> <p>The attached presentation describes the purpose and context of revisiting our system plans, the stages that have been agreed to achieve this, and progress that has been made to date with completion of Stage 1 and development of Stage 2.</p>	
<b>Recommendation:</b>	
<p>The Health and Care Partnership Board is asked to:</p> <ul style="list-style-type: none"> <li>• Note the approach to the development of the system clinical strategy</li> <li>• Acknowledge completion of Stage 1.</li> <li>• Support progression of Stage 2.</li> <li>• Receive a further report in June updating on completion of Stage 2 and progress with Stage 3.</li> </ul>
